July 2014 is a busy month for Arts Education at Independent Schools Victoria. Following the successful *Creating Connections* exhibition, which was held as part of the InSEA 34th World Congress, we are launching our Annual Student Art Exhibition on Tuesday 29 July 2014.

Together, the exhibitions will showcase over 300 artworks from 74 Member Schools.

The Annual Student Art Exhibition will be opened by the Victorian Minister for Education, the Hon. Martin Dixon, MP, and will be held at Shell House, No 1 Spring Street, Melbourne. Exhibited artworks will include pieces created in two and three-dimensional traditional media as well as digital works in a new projected format supported by Canon.

**Annual Student Art Exhibition 2014**

The Arts Education seminar program for Semester 2, 2014 includes:

**Creative Arts Photographic and Film Media Programs in Middle and Senior years**

This interactive, one-day workshop is for teachers needing to expand their knowledge of how best to utilise digital programs to facilitate improved outcomes for students’ digital project needs in an arts education context.

**Great Partnerships – The How-to Guide for Arts and Education Partnerships**

A one-day workshop presented by Arts Victoria that helps to identify the value of teaching artists in schools programs, which can be used to develop broad based project learning, including whole-school or multiyear level approaches.
Enriching Learning through Image – Supporting the General Capabilities through Arts-Based Approaches

Designed for primary teachers, this program shows how to enrich multidisciplinary learning through the use of arts-based approaches. A focus on the AusVELS framework and the general capabilities of the Australian Curriculum will help create valuable classroom resources and inform visual fluency and build greater engagement.
